**Joakim Andersson**

**19750121-2455**

## SUMMARY AND OBJECTIVE

### SUMMARY

I am a committed and present leader who has experience from several different industries such as Automotive, the consumer goods industry and the wood furniture- and construction industry. I have a background as a technician with a high technical understanding and have an easy time learning how processes work. I can quickly see how flows are connected and can develop them in practice so that the business improves. Good IT skills and handles English fluently in speech and writing

### OBJECTIVE

It is important to create a common goal for everyone in the team and to find a purpose with the goals that attract both the brain and the heart. When we in the team find a commitment and see an opportunity to contribute, the business will achieve its goals faster and be persistent in its improvement work. It is my role as a leader to carry out.

## 2021-Current

### Owner Verksamhetspartner i Jönköping AB

Interim Management, Project Lead and Business development activities

## 2018- current

### Director Supply Chain Nordic Nobia AB

Joakim is responsible for 6 plants in 4 different countries. The plants all produce kitchens and have a full process flow from component manufacturing to consolidation of complete orders. The org set up is appr 2000 people depending on volumes and seasonality. The plant managers report to Director of Supply chain and engineering, quality and logistic is regionalized in a Nordic set up reporting to Director Supply Chain. Joakim has reorganized from a decentralized organization to a regionalized set up. One of the most important task and responsibility for Joakim personally has been to establish a business case about a greenfield project to build a new Mega plant in Jönköping Sweden from idea to a board decision. Joakim has found the strategic location, negotiated the terms with three different municipalities and signed the contract for purchase of land. Joakim made all the negotiations with the unions about Tidaholm plant relocation to the new greenfield plant in Jönköping and he was the Project Manager from idea to the launch of the project. He made a full business case and Capex proposal.

## 2014-2018

### Operations Director/ Inwido Sverige AB

### Managing Director Inwido Produktion AB

Responsible for 8 plants in Sweden. The plants produce windows, doors and sliding doors and have a full process flow from component manufacturing to consolidation of complete orders. One of the plants also produced isolated glass. Purchasing and sourcing was also a part of this position. The plant managers report Operations Director and there are also some support functions reporting directly to the Operations Director. During this period of time Joakim worked a lot with the manufacturing footprint and closed two plants and integrated them in to one of the excisting plants in Vetlanda. Joakim was also the Project leader in a big value stream mapping and investment case where he rebuild a plant totally and put in a paced flow in the assembly process. He made a value stream mapping of the plant, rebuild it with excisting equipment and as a step two he made a business case about to automate and invest in partly new equipment to take the next step in the profitability. His technical knowledge about Lean and to implement change helped Inwido to manage this turnaround and the business went from a low profit margin to a good profit margin for the industry. When Joakim was the Operations Director/MD he was in personal lead to set a totally new Sales and Operations Planning process for the company and by that he

implemented a new way of working in the Supply Chain and in the commercial forecasting.

### **2013 – 2014 Director Global Supplier Development Husqvarna AB**

Joakim started up a new global function in the Global Sourcing for Husqvarna Group within Cost estimation, Value engineering and Supplier Development. Major operational tasks was to support sourcing with cost calculations and to support suppliers in how to increase the profit, capacity or quality. This position was a combination of a start up, strategic support to sourcing but also implementing change in suppliers processes. Joakim implemented a cost estimation tool and a process for Value Engineering. One important task for Joakim was to lead a task force at Suppliers when capacity constraints/quality problems occurred. He also lead Value Stream mapping/Kaizen workshops in the Suppliers plants together with the local management to implement a higher capacity, better quality and a more profitable business.

### **2006 – 2013 Plant Manager Husqvarna AB**

A plant producing chainsaws, trimmers and hedgecutters with appr. 600 people in peak season. During the Financial crisis he rebuild the plant totally to a production with a paced flow, automated manual work and with totally new line feeding principles in the internal logistic. Joakim also implemented The Husqvarna Operating System and the plant become the early adopter in the Husqvarna group for a new Lean thinking.

### **2001 - 2006 Plant Manager Kongsberg Automotive AB**

A plant with several different processes such as Plastic Injection Moulding, Welding, stamping of Sheet metal, bending of tubes and CNC machining. Joakim started in this plant as an engineer and focused early on Lean Production. He developed new ways of working influenced by Toyota Production System combined with automation and collaboration with all people about Continuous improvements. Many companies benchmarked Kongsberg Automotive as the good Swedish exemple of Lean Production after this turnaround.

### **1998 - 2001 Manager production Kongsberg Automotive AB**

### **1996 – 1998 Quality Engineer Kongsberg Automotive AB**

### **1995 - 1996 Engineer Åvalls metallindustri AB**

### **Other**

2005 - 2015                      Chairman/.V.Chairman   Smålands produktivitetsförening

2013-current                      Headcoach in my sons Floorball team

### **Education**

4-year technical college, "Diplomerad gymnasieingenjör"

Examination 1995 at Erik Dahlbergsgymnasiet, Jönköping

Several internal and external educations within leadership and Lean production
